FOR IMMEDIATE RELEASE

eRx Network Joins National ePrescribing Patient Safety Initiative as Connectivity Partner

FORT WORTH, TX and CHICAGO, IL — July 15, 2008 — eRx Network, LLC[®], a premier retail pharmacy provider of electronic services, and Allscripts, the leading provider of clinical software, connectivity and information solutions that physicians use to improve healthcare, today announced an agreement to provide connectivity between eRx Network's eRx Pad[®] pharmacy communication network and Allscripts electronic prescribing solutions.

Additionally, eRx Network will become a connectivity sponsor of the National ePrescribing Patient Safety Initiative[™] (NEPSI[™]), a coalition of leading healthcare and technology companies, led by Allscripts and Dell Computers. NEPSI is dedicated to eliminating preventable medication errors by providing state-of-the-art electronic prescribing technology at no cost to every licensed prescriber in America.

“We are excited to partner with Allscripts and support the NEPSI coalition,” said Murray Lyle, President and Chief Operating Officer, eRx Network, LLC. “Our agreement provides direct connectivity between our pharmacy clients and physicians utilizing Allscripts e-prescribing solutions, enhancing value for all stakeholders.”

eRx Network maintains a secure, reliable and performance-oriented network called eRx Pad[®] for connecting e-commerce applications to U.S. pharmacies. The network supports NCPDP Script standard and has provided pharmacy connectivity to pharmacy chains and independent community pharmacies for eight years.

“We're pleased to welcome eRx Network to the NEPSI coalition,” said Glen Tullman, Co-Chair of NEPSI and Chief Executive Officer of Allscripts. “Our partnership marks another step towards fulfilling the NEPSI goal of enabling every physician in America to prescribe electronically in order to enhance patient safety and to transmit prescriptions to their patient's pharmacy of choice.”

The NEPSI coalition was launched last year to address the public crisis surrounding preventable medication errors, which injure at least 1.5 million Americans and claim more than 7,000 lives each year, according to the non-profit Institute of Medicine (IOM), part of the National Academies of Science. The IOM's report concluded that e-prescribing definitely improves safety

over paper prescriptions, but acknowledges that fewer than 10 percent of the nation's physicians use the technology today, largely because of cost.

NEPSI removes that barrier by providing safe, simple and secure e-prescribing software at no cost to any licensed prescriber. The Web-based Allscripts solution provided by NEPSI cuts the risk of medication errors by automating the prescribing process and alerting physicians to possibly dangerous drug interactions or side effects. The solution also reduces the risk of a misread prescription and helps save money by making physicians aware of cheaper generic drug options. Used today by thousands of healthcare professionals from across the US, Allscripts e-prescribing from NEPSI requires no download, no new hardware, and minimal training.

Interested prescribers can visit the NEPSI web site, www.nationaleRx.com, to register for the program.

About NEPSI

The National ePrescribing Patient Safety Initiative (NEPSI) is a coalition of the nation's most prominent technology companies and leading healthcare organizations dedicated to improving patient safety by providing free access to *simple, safe and secure* electronic prescribing for every physician in America. NEPSI includes national sponsors Allscripts and Dell; executive sponsors Cisco, Fujitsu, Microsoft, NaviMedix, Quest Diagnostics, Sprint Nextel and Wolters Kluwer Health; healthcare sponsors Aetna, Horizon BCBS of New Jersey and WellPoint; connectivity sponsors eRx Network, LLC and SureScripts-RxHUB; and search sponsor Google. Several integrated delivery networks and physician groups across the US are leading the rollout of the NEPSI electronic prescribing solution, by Allscripts, within their states and regions.
